DESILVA — LIFTING SOLUTIONS —

OUR MAIN PRODUCTS

Passenger Lifts

With a focus on safety, efficiency, and reliability,
our lifts are crafted using cutting-edge technology
and adhere to stringent quality standards.
Our range includes a variety of lift models tailored
to suit diverse architectural and functional needs,
promising smooth and comfortable rides for passengers.

Car Lifts

From single-post to two-post and four-post lifts, we offer versatile solutions suitable for various vehicle sizes and weights, tailored to meet the needs of automotive workshops, garages, and car enthusiasts alike.
Prioritizing both functionality and safety, our lifts adhere to stringent quality standards, guaranteeing secure and seamless lifting operations.

OUR MAIN PRODUCTS...

Cargo Lifts

Cargo lifts, also known as freight elevators, are specialized vertical transportation systems designed specifically for moving heavy goods, equipment, or materials within buildings or industrial settings. These lifts are engineered to safely transport large and bulky items between different floors, warehouses, storage facilities, or industrial spaces.

Hospital Lifts

Understanding the critical nature of vertical transportation in medical settings, we engineer our lifts with a focus on precision, reliability, and utmost safety. These specialized lifts are equipped with cutting-edge features, including smooth and rapid movement, spacious interiors for accommodating medical equipment and stretchers, and stringent infection control measures.

Dumbwaiters

Our range of dumbwaiters encompasses innovative solutions tailored for both residential and commercial spaces, catering to the diverse needs of our clientele. Crafted with a focus on efficiency, reliability, and space optimization, our dumbwaiters are engineered using cutting-edge technology and adhere to stringent quality standards.

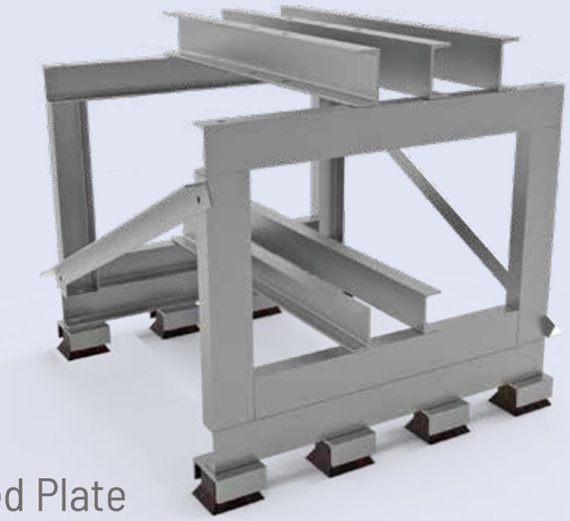

MR Systems

These traction elevators have a gearbox which is attached to the electric motor and turns the hoist sheave and moves the rope. Geared traction elevators are driven by either direct current (DC) or alternating current (AC) and their maximum speed is up to 500 ft. per minute. This speed limit is lower than gearless traction elevators but higher than many other types of elevators. Moreover, these elevators are capable of traveling to a maximum distance of 250 ft. Geared traction elevators have fair installation and maintenance costs, and low energy consumption. While their speed is slower than gearless elevators, geared elevators offer advantages in terms of energy efficiency as they use less power to turn the pulley (sheave). Furthermore, these elevators have the ability to lift loads up to 13600 kg

Safety Rules For The Construction and Installation of Lifts

- EN 81-1 — Europen Standard (Previous Version)
- EN 81-20 — Europen Standard (New Version) — Lifts for the transport of persons and goods
- EN 81-28 — Europen Standard — Accessibility to lifts for persons including persons with disability - Europen Standard
- EN 81-70 — Behaviour of lifts in the event of fire Europen Standard
- EN 81-73

MRL Systems

These traction elevators have the wheel directly attached to the electric motor. Gearless traction elevators have a very high travel speed i.e. up to 2000 ft. per minute and can travel a great distance. Their maximum travel distance is almost 2000 ft. and thus they are the best and the only choice for high-rise buildings. These elevators had the ability to be employed in all kinds of buildings of any height and had a much higher speed than other hydraulic elevators. The gearless traction system, since then, has proven to be so durable that even today it is the best and most reliable option available for high-rise applications. These elevators function using a wire cable (hoisting ropes) which is attached to the elevator top and wrapped around the sheave on one end. The other end of the cable is attached with a counterweight that raises and lowers in the hoist way. The weight of the cab and counterweight together press the cable which then turns the sheave and the elevator begins moving. To keep the load on the electric motor minimum, the counterweight is matched with the weight of the elevator cab and half-load of the passengers. As the elevator cab moves upwards, the counterweight begins to move downwards, and in this way it balances the elevator load. This significantly reduces the energy consumption as the motor only bears the weight of half the cab load.

Safety Rules For The Construction and Installation of Lifts

OUR OTHER PRODUCTS

Generators

Elevate your power back-up with Bemaric Building Solutions! We offer new, preowned, and refurbished generators from top brands like Cummins, Perkins, AKSA, Colt, Doosan, Kohler, KJ, TATA and Lister Peter. Ranging from 2KVA to 4000KVA, our generators ensure uninterrupted power for commercial centers, residential apartments, industries, and hospitals. Choose confidence with warranties up to 3 years and enjoy a complimentary first service. Empower your projects with Bemaric – Your Trusted Generator Partner for developers and engineers!

Water Heaters

Elevate your comfort with Bemaric Building Solutions – your go-to for premium water heating solutions!
Explore our options, featuring solar water heater systems of capacity 100L to 350L to customizable tanks of up to 4000L, Electric water heaters of capacity 20L to 500L, and efficient Heat pumps of capacity 100L to 350L. Our products are affordable, adaptable to both soft and hard water, and renowned for reliability. Enjoy peace of mind with warranties spanning 2 to 5 years. Bemaric, where excellence meets affordability in water heating solutions!

Solar PV Solutions

Are you tired of rising electricity bills? At Bemaric Building Solutions, we offer a diverse range of solar PV solutions designed to transform the way you power your world. Harness the limitless potential of the sun and embark on a journey towards sustainable energy independence. Choose Bemaric Building Solutions and embrace a future powered by clean, renewable energy. Illuminate everyday!

Internet & Surveillance

Elevate your surveillance with Bemaric Building Solutions, integrating industry leaders like Hikvision, Cisco, Dell, APC, and Samsung. Hikvision delivers top-notch video solutions, Cisco excels in seamless networking, Dell provides robust computing infrastructure, APC ensures uninterrupted power, and Samsung enhances visuals. Experience collaboration-driven innovation for end-to-end solutions, from cameras to storage. Tailor your system with a mix-and-match approach, selecting components to suit your needs. Stay ahead with Bemaric's cutting-edge surveillance solutions, where customization meets innovation. Note that partnerships evolve; stay informed with the latest updates from these industry giants for optimal solutions.

Air Conditioners

Whether it's a single room or an entire building, Bemaric Construction has the expertise to provide the perfect climate control solution. Customize your air conditioning system by selecting the best components from our trusted partners, ensuring a cooling experience tailored to your unique needs. Stay ahead of the curve with Bemaric Construction's innovative solutions, where efficiency meets comfort. Keep informed on the latest advancements from these industry giants to always have the most advanced technology at your disposal.

ABOUT US

Excellence

Our people, processes and products must be of the highest industry standards, always.

Integrity

Our business must be a conduit for improved human lifestyle and global development. Accordingly, we seek clients, markets, and industries that are dedicated to making a positive impact on the world.

Partnership

Diverse thinking is vital in tackling some of the complex global challenges. We bring a diverse and multi-disciplinary team of professionals together to strengthen our work in all areas

Invention

We attract the best talent by creating a culture of innovation and developing products to meet global challenges

Flexibility

We readily adopt to client needs and changing environments. Internally. we espouse a work culture that prizes employee flexibility and growth.

Customer-Centric Approach

We prioritize your needs, offering personalized services, expert guidance, and ongoing support to ensure your complete satisfaction.
